

Portland Large Fan in our *new* watercolor, W97

PORTLAND FIELD

G1-114 Portland Lg. Elongated Ogee R210

We're pleased to introduce the **Portland** field option to our tile offering! Both the surface and edge of Portland field tile reveal the unique markings acquired through the handmade production process. These characteristic traits are what make Portland field so appealing and beautiful.

Portland surface markings can appear either subtle or more pronounced, depending on the glaze you select. Using Watercolors will allow for more transparency, while using opaque, matte glazes will conceal more of the surface marks. The Portland edge is crisp yet has an organic feel. Glazes break differently along this slightly rustic edge, creating a unique effect.

Portland Field can be installed with a slightly tighter grout joint for a more modern, Zellige style look.

Any of our flat field tile (squares, rectangles or shapes) can be ordered as Portland field in any of our monochrome glazes.

Portland Field is handmade and will vary from tile to tile. We recommend ordering current color samples to see the full range of both surface and color. For samples and retail pricing, please visit our [website](#) to locate a dealer near you.

Thank you for your interest in Pratt & Larson!
