SCRAFFITO

SCRAFFITO

The Scraffito series is inspired by the ancient technique in which a surface layer is scratched to reveal a ground of contrasting color. These original designs were hand carved giving the lines a beautiful, drawn quality rarely captured in ceramic tile. Incorporating Scraffito into your project will allow you to create a field of gorgeous, overall pattern.

Scraffito is available in any of our glaze colors or may be hand painted using our Polywash technique. In a single color, glazes will melt and pool in the recesses of the design. More opaque glazes can hide the pattern, while translucent glazes can emphasize the lines. These designs can be further enhanced when hand painted. Each tile holds color in its own way, fine lines hold less color and deep lines hold more.

Pratt + Larson has been making custom, hand crafted tile since 1982. Our luxury tile studio is located in the heart of Portland, Oregon and our mission is to enrich your environment and your life. Our tile is available for purchase through our network of partners throughout the US and Canada.

POLYWASH

Enhance the design elements of any Scraffito pattern by using our handpainted, Polywash technique.

Choose from any of the 16 gorgeous accent colors shown below. Each pattern will hold the color in its own way, fine lines hold less color and deep lines hold more.

The palette below uses W1 as the over glaze which is clear, allowing these accent colors to shine and sparkle. Changing the over-glaze adds a wash of color over the whole tile. With a darker over-glaze some of the accent colors can be obscured. The more contrast between the accent and the over glaze the better the pattern will stand out.

Polywash tiles are hand crafted and hand painted. Range and variation in color is to be expected.
